

Web Portal and Coretech Mobile

The Web Portal allows direct access to our secure data network from your smartphone or tablet to view the current project details in near real time.

This instant mobile access provides the executive, manager or oil companies the ability to monitor the progress on the go and make confident decisions without having to go to the field. Coretech Web Portal and Mobile provide companies with a “Visual Advantage” to their field operations.

“
**Coretech Web Portal
and Mobile provide
companies with a
“Visual Advantage” to
their field operations.**

”

FEATURES:

- Coretech Dashboard for quick access to near real time project information – Project Status, ROP, Total Cut/Recovery, estimate Field Ticket Amount
- View and edit memos and events logs
- Google map integration displays your project coordinates, township, region, and country information (*Web portal only*)
- Display current and historical data for each project
- Run Coretech specific reports for measuring Key Performance Indicators (*KPIs*)
- View history of contractor reports and Tour Sheets per project
- Export all Tour Sheet data to XML (*per CAODC specifications*)
- Added value dashboard and reports for detailed analysis

“

Coretech Web Portal and Mobile provide companies with a “Visual Advantage” to their field operations.

”

BENEFITS:

- Access to information from anywhere, anytime
- Fully customizable – upload to your logo to brand your labels and reports
- Save you time and money by having quick access to the information. Reduce unnecessary trips to the field.
- Set up projects from the office via web portal and save start up time
- Save money on service requests - Configure your company defaults such as: add/edit users, set rate cards, run parameter depth increment per project, create crews and coring units, project status types and more.
- Ability to access reports and data to create benchmarks and other KPIs

REQUIREMENTS:

- Coretech Core Management System
